BUENOS AIRES

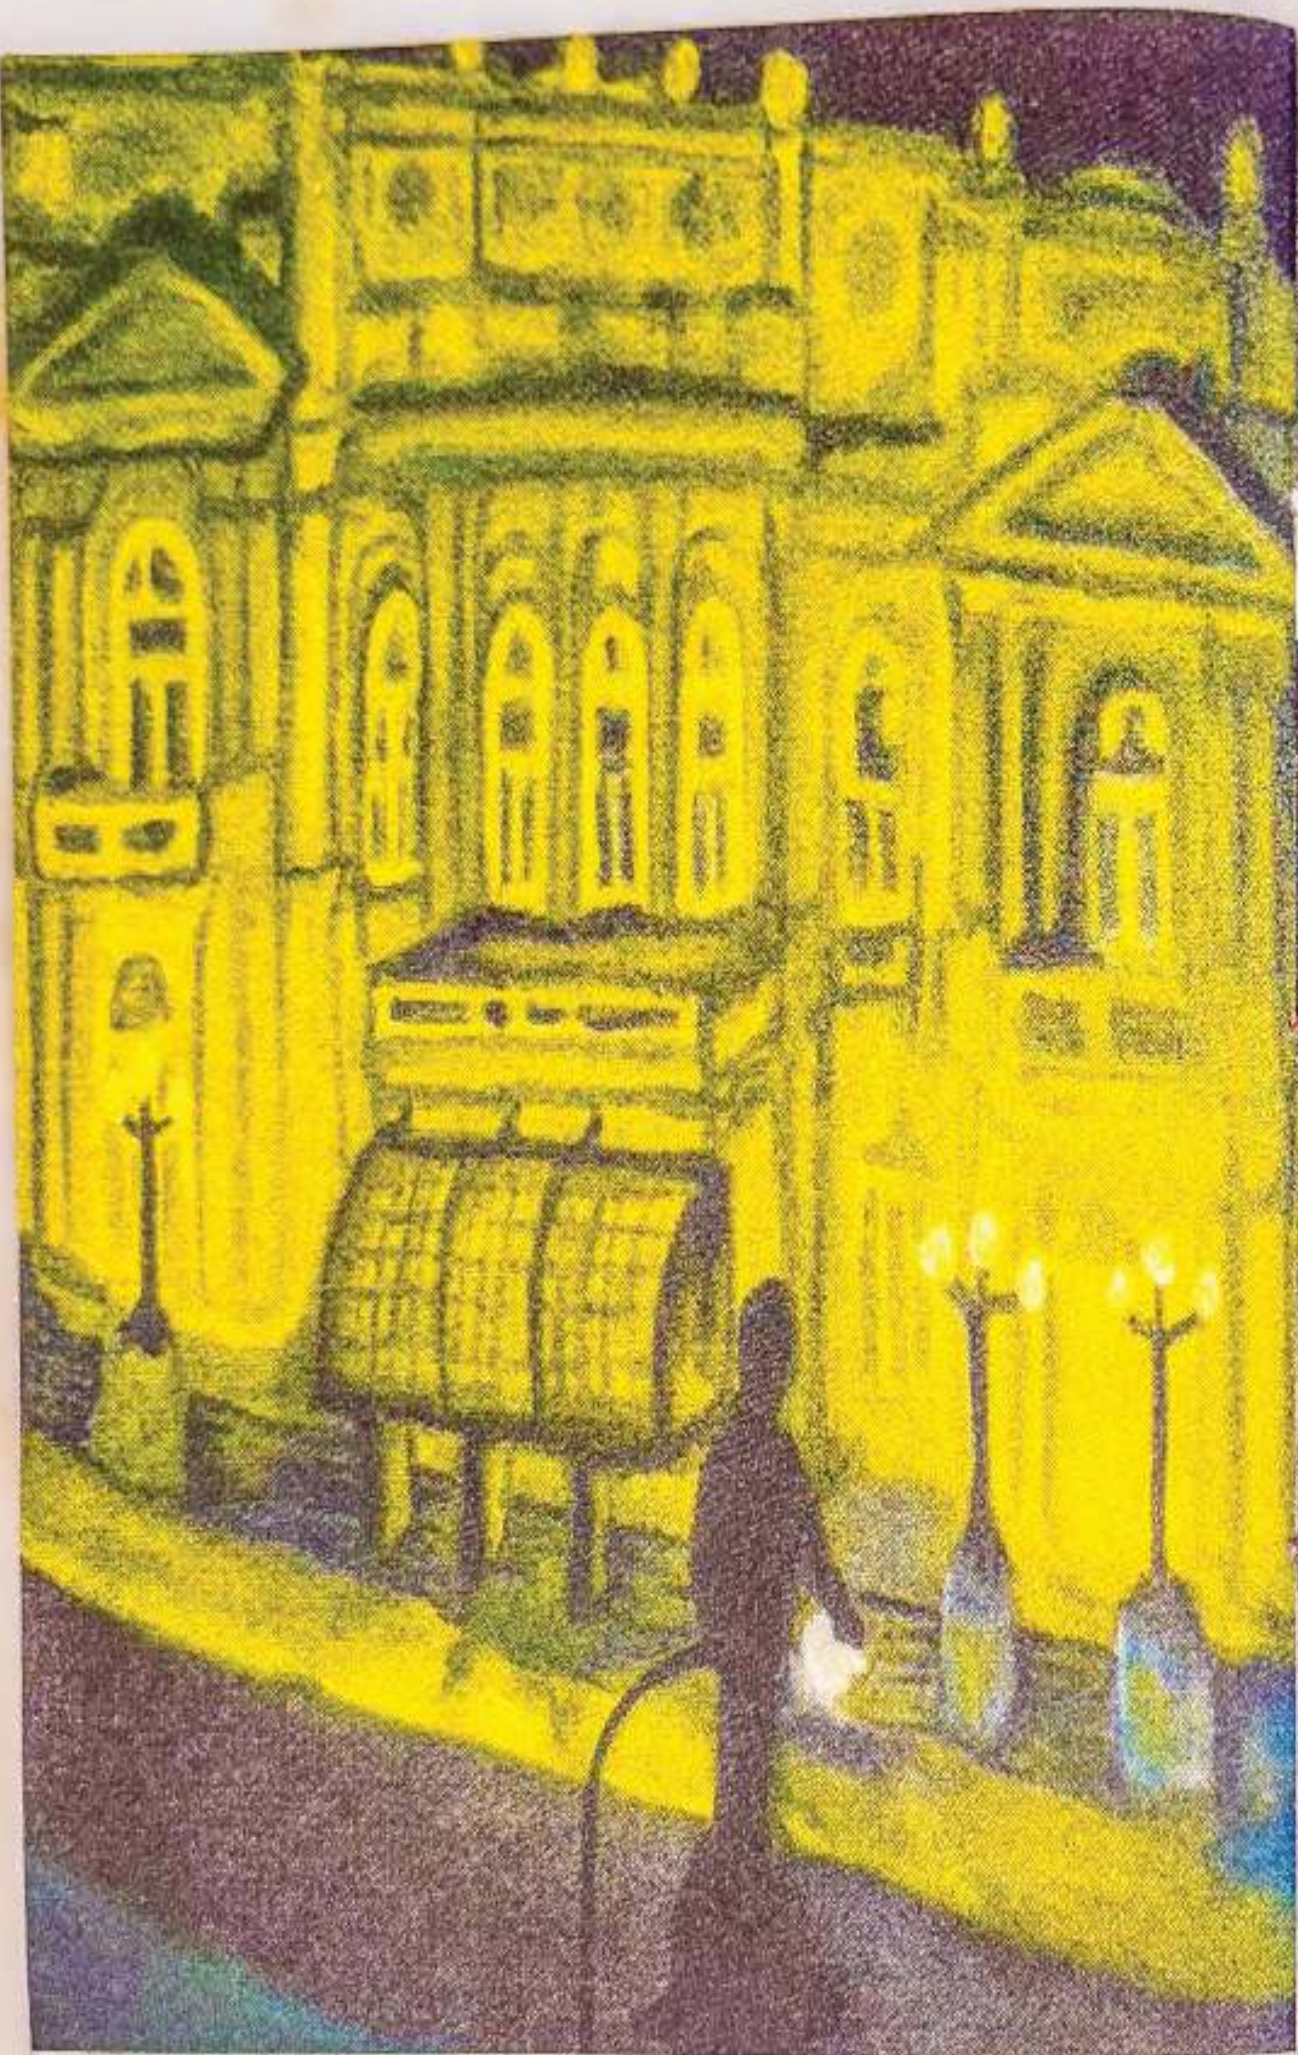

The postcard is just one of many—each a glimpse into his indecision about where he wanted to live. All the ones I found were from Buenos Aires. A city I've never been to, and maybe never will.

What stays with you after growing up with a narcissist isn't something you can hold—it's the invisible aftermath most people don't see or acknowledge. After he left, barely anyone offered my mom help. People assumed the impact wasn't that big, but it was—clearly. I froze under those assumptions, often nodding along because who's really prepared to hear a long chain of tragic events?

The postcard painting is about eight times larger than a regular postcard (A6). That scale is intentional. By enlarging it, I'm asking the viewer to confront the intangible impact of something so seemingly small and ordinary.

This postcard might mean everything to me—and probably nothing to anyone else.
